YOUR MOVEMENT

VISION

We are committed to innovation and openness, by adapting to the market globalization.

We support the development of modern professionalism and the always growing integration among the Group companies, with the purpose of becoming a clear point of reference within new sectors.

MISSION

Power and movement control - this is our passion. Our network of multi-professional companies and synergies provides full and customized service in the sectors of hydraulics and automation in a skilful and creative way.

EXPERTISE

The combination of knowledge and advanced technologies has led to a unique fund of know-how, professionalism and experience, developed over years of presence in the sector.

MULTI-PROFESSIONALISM

Team work and trusted relations enhance the expertise of each company within the Group.

The complementarity of diversified experiences enables us to offer exclusive solutions and full support.

PARTNERSHIP

We believe in cooperation and in the value of time. For this reason, we are at our customers' disposal by focusing on finding quick and complete solutions to satisfy specific needs.

CREATIVITY

The search for creative solutions and an outlook into the future are the key to progress. We are aware of our customers' needs and are able to transform them in both customized and innovative solutions.

TRANSPARENCY

The building up of trusted relations requires a mutual truthfulness. The Group distinguishes itself by operating seriously, with reliability and transparency, in order to ensure both confidence and a high-quality service to the customer.

FAMILY

We are a large corporate family operating with firm passion. We place people at first - in line with a policy of ethical, responsible and sensitive behaviour towards all interlocutors.

OUR PASSION

FLUIDMEC

Over the last 40 years, Fluidmec has become a well-established company in the distribution of hydraulic and pneumatic components of the major brands.

Large and immediate availability adds to continuous technical and commercial service and training of advisors.

O+P[®]

O+P is a leading company in the equipment manufacturing for flexible and rigid hydraulic pipes. Thanks to a large product range and a wide-spread service, the company has been able in only 20 years to enter markets worldwide and is continuously growing.

EFFEGI SYSTEMS

Since 1988 Effegi has been specialized in a niche sector: design and construction of special cylinders and hydraulic power units.

UNISEALS

Uniseals manufactures lathe-cut and special seals for all industrial sectors, with the aim to grant customers quick, precise and customized service by means of blends specially designed for specific needs.

BRESCIA HYDROSERVICE

Brescia Hydroservice is specialized in maintaining, servicing and overhauling hydraulic and pneumatic power units and plants.

BRESCIA HYDROPOWER

Brescia Hydropower is founded on a 30 years experience background in the realization and design of hydraulic plants and any type of testing system.

SINDE

Since 2001 Sinde has been specialized in mechanical precision processing and mounting of complete units. Cutting-edge machinery along with organizational flexibility enable Sinde to supply both mass-produced and unique parts even of large dimensions.

CEPROM SYSTEMS

Since 1982 Ceprom has been specialized in the design, realization and installation of industrial automation plants, machinery and systems.

FLUIDSENS

Established in 2011, Fluidsens creates solutions for remote monitoring and hydraulic plant optimization by means of Research and Development.

FLUIDSENS

The strength of our Group - **It's Fluidmec World** - lies on our people and their multi-professionalism.

An organizational structure and a territorial network with headquarters in Italy and branches abroad. The combination of complementary forces has enabled the constitution of a solid organization, where the group companies identify and integrate, resulting in a variety of competencies that are able to satisfy any need within the world of hydraulics, pneumatics and automation.

Values, know-how and experience sharing leads to growth and enables us to constantly raise our profile on the market and to look at new sectors with professionalism, reliability and innovation.
